WATER PURIFIERS

THE FROG: POOL WATER PURIFIER

Fresh Reservoir Oxy Generator from New Water. The FROG hardware is three parts in one. First, the FROG cycler serves as a “water treatment center” and controls the flow of water. Secondly, there is a cycler inside the FROG reservoir that’s removable and holds the minerals. Thirdly, inside the FROG reservoir is a CHLORINE PAC. It’s nested together in one complete unit. NO extra plumbing. NO extra headaches. And NO electricity since nature doesn’t use electricity to purify water, why should we? The FROG makes the water feel softer and sparkling clean. It fights bacteria and eliminates algae prevention. The minerals help to keep your water pH balanced by acting as a neutralizer.
