PONY PUMP® SERIES - 1/10 HP

APPLICATIONS

Commercial, industrial, and home uses where liquid must be transferred

FEATURES

- Self-priming for instant delivery or dewatering up to 6 ft (1.8 m)
- Non-submersible stainless steel or plated brass pump body
- Rugged metallic handle for easy portability
- Dual threaded intake and discharge with both 3/4" male garden hose thread and 3/8" FNPT
- Model 360K includes pump, hose, strainer, and suction adapter
- Separate kit options available
- Includes 2 extra impellers and gasket
- Model 365 and 365S include 6 ft (1.8 m) lead wires with battery alligator clips
- Models 360 and 365 have a nitrile shaft seal
- Model 370 has a fluoroelastomer shaft seal for improved temperature and abrasion resistance

UPSP-5 SERIES - 1/2 HP

APPLICATIONS

Pressure boosting for washing vehicles, flooded basements, watering lawns, draining water heaters

FEATURES

- Non-submersible, inline, portable, all cast iron utility transfer pump with integral carrying handle
- Self-priming to 15 ft (4.6 m) when priming chamber is filled
- Priming chamber plug can be removed and installed by hand and features an o-ring seal
- Can also be used to boost water pressure for washing vehicles, sidewalks, and more
- Convenient 3/4" (19 mm) brass garden hose adapters on intake and discharge
- Engineered thermoplastic impeller
- 3/4" (19 mm) FNPT discharge
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed
- Includes wire form stainless steel suction strainer accessory

Bearings	Front and back ball bearings
Power Cord	SJT

5 SERIES - 1/6 HP

APPLICATIONS

The 5-Series is one of the most compact utility pumps on the market. Ideal for light commercial and multi-purpose residential applications where water removal, transfer, or circulation is required.

FEATURES

- Corrosion- and rust-resistant, epoxy-coated cast aluminum pump housing gives strength and high heat dissipation for both consumer and professional use
- Rated for continuous duty which allows for a wide range of applications and uses
- Compact design with manual version weighing in just under seven pounds makes this pump truly portable
- 1/6 hp energy efficient and oil free PSC motor is environmentally friendly and delivers 1500 gph maximum capacity
- FKM triple-lip seal
- Upper and lower ball bearings for long life
- 1" FNPT (25.4 mm) discharge (includes garden hose adapter for quick plug and play)
- Removable inlet screen allows for easy cleaning without tools
- In manual operation, pumps down to 1/8" (3.2 mm) with screen, and down to 1/16" (1.6 mm) without screen reduces overall water removal clean up time and effort
- Multiple switch options for automatic operation gives application flexibility
- Multiple power cord lengths available
- 120 °F (49 °C) maximum liquid temperature rating
- cULus on items 505723, 505712, 505714, 505715, 505717

Shaft Seal	Fluoroelastomer (FKM)
Fasteners	Stainless steel
Bearings	Upper and lower ball bearing
Power Cord	SJTW
RPM	3450
Motor Type	PSC

FLS/FS SERIES - 1/2 HP, 1 HP

APPLICATIONS

Water transfer or recirculation and general construction dewatering

FEATURES

- 1/2 hp or 1 hp permanent split capacitor (PSC) motor with overload protection
- Designed for continuous duty
- 2" MNPT discharge
- 120 °F (49 °C) liquid temperature rating
- cCSAus listed

Motor Shaft	Stainless steel
Seals	Double mechanical seals (lower - silicon carbide on silicon carbide, upper - carbon on ceramic)
Fasteners	Plated steel
Bearings	Upper and lower ball bearings
Power Cord	SJTW 14/3

5.5 SERIES - 1/4 HP

APPLICATIONS

Basement sumps

FEATURES

- PSC motor with thermal overload protection
- Integral snap-action float switch
- 1-1/2" discharge
- 3/4" GHT (19mm) garden hose adapter included
- Screened inlet handles up to 3/8" (9.5 mm) solids
- 120 °F (49 °C) liquid temperature rating
- cCSAus listed

6 SERIES - 1/3 HP

APPLICATIONS

Basement sumps, dewatering, water transfer

FEATURES

- Shaded pole motor with thermal overload protection
- Designed for continuous duty
- Oil-filled motor housing
- PVC riser legs (506162 only)
- 1-1/2" FNPT discharge (38 mm)
- 1-1/4" FNPT (31.7 mm) reducer bushing included with select models
- 3/4" GHT garden hose adapter included with select models
- cCSAus listed (115 V models only)

6EC SERIES - 1/3 HP

APPLICATIONS

Basement sumps, dewatering, water transfer, light effluent

FEATURES

- Heavy-duty cast iron construction
- Permanent split capacitor (PSC) motor with thermal overload protection
- Designed for continuous duty
- Energy-saving low amp draw
- 1-1/2" FNPT discharge (38 mm)
- Handles up to 1/2" (12.7 mm) solids
- Multiple switch options for automatic operation
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

CONSTRUCTION

Cover	Epoxy-coated cast iron
Motor Housing	Epoxy-coated cast iron
Impeller Material	Nylon
Volute	Epoxy-coated cast iron
Mechanical Shaft Seal	Nitrile with carbon and ceramic faces
Fasteners	Stainless steel
Shaft	Cold-rolled steel
Bearings	Upper and lower ball bearings
Power Cord	SJTW, SJTOW (506854)

HT-6E SERIES (HIGH TEMPERATURE) - 1/3 HP

APPLICATIONS

Boiler blow-down sump pits, transformer vaults, water transfer, light effluent

FEATURES

- Shaded pole motor with thermal overload protection
- Designed for continuous duty
- 1-1/2" FNPT discharge (38 mm)
- Handles up to 1/2" (12.7 mm) solids
- Integral mechanical float switch
- Up to 200 °F (93 °C)
- CSA listed

SERIES SPECIFICATIONS

8 SERIES - 4/10 HP

APPLICATIONS

Basement sumps, dewatering, water transfer

FEATURES

- Shaded pole motor with thermal overload protection
- Designed for continuous duty
- Oil-filled motor housing
- Cast iron or cast bronze pump housing
- 1-1/2" FNPT discharge (38 mm)
- 1-1/4" FNPT (31.7 mm) reducer bushing included
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

WRS SERIES - 1/6 HP, 1/3 HP, 4/10 HP DRAINOSAUR® & DRAINOSAUR JR.®

APPLICATIONS

Impractical drainage areas, under sinks, laundry trays

FEATURES

BASIN FEATURES

- 3.5 and 5 gallon size options
- Polypropylene, lightweight, corrosion-resistant
- Designed with O-rings for watertight seal
- Cover includes removable filter for easy cleaning
- Cover includes 2" FNPT discharge (outlet), 2" FNPT vent, 1-1/2" FNPT inlet, and 2" MNPT to 1-1/2" FNPT reducer bushing
- IAPMO listed
- Pre-assembled, ready to install

PUMP FEATURES

- 1/6, 1/3, and 4/10 hp options
- Multiple switch options
- cCSAus listed (pump only)

SPK SERIES - SUMP PUMP SYSTEM

APPLICATIONS

The SPK series pump packages are ideally suited for basement sumps and flood control applications

FEATURES

- Prepackaged system (assembly required) has everything you need for an installation in one SKU; SPK-8CIA-1A even comes with a tank alert alarm system for peace of mind
- The system includes the time tested Little Giant 6 or Little Giant 8 Series of sump pump paired with the Little Giant diaphragm switch
- Pumps include extension feet to keep the pump off the bottom of the basin to prevent ingestion of debris for long pump life—no additional stands needed for the pump
- 18"x22" polypropylene basin with 4" Adapt-A-Flex grommet included will yield many years of trouble-free service and easy installation
- Clear view check valve included for easy inspection and diagnostics along with the required NPT threaded 1-1/2" discharge pipe
- Bolt on polypropylene cover included for a simple and secure installation

APS-115 - BATTERY BACKUP SYSTEMS

APPLICATIONS

Sump, effluent, and sewage pump power backup system

FEATURES

- Fully automatic charging system
- Powers existing sump, effluent or sewage pump in the event of a power outage
- Operates 115 Volt pump up to 1/2 hp
- Requires 2 size 27 or 31 deep cycle marine batteries
- Easy installation with no modification or piping changes to existing pumping system
- Microprocessor monitors all electrical functions
- LCD display indicator lights:
 - Power – Green LED
Solid when unit has power. No light indicates power off.
 - Inverter – Red LED
Blinks when unit is powered by inverter and silent button has NOT been pressed. Solid when unit is powered by inverter and silent button has been pressed. Off when unit is operating off AC line voltage.
 - Alarm – Red LED
Blinks when alarm occurs and silence button has NOT been pressed. Solid when alarm occurs and silence button has been pressed. Off when no alarm condition is present.
 - Alarm Contact – NC

NOT FOR SALE IN CALIFORNIA:

The battery charger contained in this product does not meet the California Efficiency Regulations codified at 20 CCR 51601-1608.

SPBS SERIES - BATTERY BACKUP SYSTEMS

FEATURES

SPBS-10HF-6 AND SPBS-12HF-10 SERIES

- 12 VDC backup pump
 - Durable non-corrosive pump housing with stainless steel fasteners
 - Easily removed bottom suction screen for serviceability and maintenance
 - Diaphragm switch activated
- 115 VAC primary pump
 - Heavy-duty cast iron construction
 - Energy-efficient permanent split capacitor (PSC) motor with automatic reset thermal overload protection
 - 1-1/2" FNPT discharge piping size
 - Lift ring for easy and quick installation
- Pre-assembled
- Check valve, elbow connector, and pump coupling
- Battery box holds size 27, 12 V deep cycle battery (battery not included)
 - *Recommended 12 VDC deep cycle battery, lead acid or AGM
- Model 506411
 - 12 VDC backup pump
 - 42 gpm (159 lpm) at 0 ft (0 m) and 20 ft (6.1 m) shut-off
 - 10 amp controller/charger/alarm unit
 - 1/3 hp, 115 VAC primary pump
 - 53 gpm (201 lpm) at 5 ft (1.5 m) of lift and 28 ft (8.5 m) shut-off
- Model 506410
 - 12 VDC backup pump
 - 53 gpm (201 lpm) at 0 ft (0 m) and 23 ft (7 m) shut-off
 - 12 amp controller/charger/alarm unit
 - 1/2 hp, 115 VAC primary pump
 - 67 gpm (254 lpm) at 5 ft (1.5 m) of lift and 36 ft (11 m) shut-off

SPBS SERIES - BATTERY BACKUP SYSTEMS

FEATURES

CONTROLLER/CHARGER/ALARM

- Input: 120 VAC, 3 Amp
- Output (Maximum Charging Current):
 - Model 1210HF: 12 VDC, 10 Amps with SPBS-10HF and SPBS-10HF-6
 - Model 1212HF: 12 VDC, 12 Amps with SPBS-12HF and SPBS-12HF-10
- Use only with 12 VDC deep cycle battery rated 85-140Ah, lead-acid or AGM
 - A controller/charger monitors the battery condition and charges the battery when required. It also alerts the homeowner when the system has operated or when possible flooding conditions exist.
 - Microprocessor controlled charging unit maintains a maximum battery charge. Built-in overcharge protection to prevent damage to the battery.
 - Battery continually monitored to maintain full charge
 - Test button to manually run backup pump to ensure proper operation
 - Protects against reverse polarity, short circuits, and input overloads
 - Audible alarm during 12 VDC pump operation
 - Indicator lights (LED) for:
 - Power On
 - Charging
 - Pump Run
 - High Water
 - Battery Charge Level
 - Replace Fuse

PERFORMANCE

SPBS-10HF and SPBS-12HF, 12 VDC Backup Sump Pump

6EC - SPBS-10HF-6, 1/3 hp Primary Pump

10EC - SPBS-12HF-10, 1/2 hp Primary Pump

SPBS SERIES - BATTERY BACKUP SYSTEMS

BACKUP SYSTEM ON A COMMON DISCHARGE

SPBS SERIES - BATTERY BACKUP SYSTEMS

BACKUP SYSTEM ON A SEPARATE DISCHARGE

SPBS SERIES - BATTERY BACKUP SYSTEMS

TYPICAL INSTALLATION

OS3 SERIES (OIL SENSING SUMP SYSTEM)

APPLICATIONS

Ideal for elevator sump pits, transformer vaults, and water-and-oil prone confined spaces in accordance with ASME - A17

FEATURES

- Multiple indicator lights: power, pump run, high water, high oil, pump overload, and 6 ft SJTOW cord
- Single-piece sensor for easy installation
- ASME - A17 compliant
- Includes remote alarm
- Alarm panel can be connected to Oil Sensing Sump System's remote panel which contains audio/visual alarming
- Both the main panel and remote alarm panel have auxiliary contacts for connection to a building's automation system or SCADA system

INSTALLATION DATA

REMOTE ALARM HAS ADDITIONAL
AUXILIARY CONTACTS FOR BUILDING
ALARM SYSTEM

CONSTRUCTION

Sensor	
Housing	ABS
Probe	Stainless steel
Float	PVC

Control Panel	
Enclosure	Type 1
Power Cord	6' SJT, 120 VAC
Receptacle	SJT, 120 VAC, 15 amp

Alarm Panel	
Enclosure	Type 1
Power Cord	Plug in transformer, 120 VAC
Backup Power	9 VDC battery backup
LED Indicators	Trouble, high level, high oil
Audible Alarm	103 db buzzer, auto test/reset

6EC SERIES - 1/3 HP

APPLICATIONS

Basement sumps, dewatering, water transfer, light effluent

FEATURES

- Heavy-duty cast iron construction
- Permanent split capacitor (PSC) motor with thermal overload protection
- Designed for continuous duty
- Energy-saving low amp draw
- 1-1/2" FNPT discharge (38 mm)
- Handles up to 1/2" (12.7 mm) solids
- Multiple switch options for automatic operation
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

SERIES SPECIFICATIONS

HT-10EN HIGH TEMPERATURE - 1/2 HP

APPLICATIONS

Boiler blow-down, effluent wastewater removal, sump pits, transformer vaults

FEATURES

- Rated for continuous duty use dewatering, water transfer, and effluent wastewater removal applications
- Energy-efficient PSC motor with thermal overload protection
- Handles liquids up to 200 °F (93 °C)
- Heavy duty epoxy coated cast iron housing
- Solids handling up to 3/4" diameter
- cCSAus listing

14EH/16EH SERIES - 1/2 HP, 1 HP

APPLICATIONS

Effluent wastewater removal, dewatering, water transfer

FEATURES

- Permanent Split Capacitor (PSC) ball bearing motor
- High speed 3450 rpm
- Completely submersible, designed for continuous duty
- High head model
- 2" FNPT (51 mm) discharge
- Handles solids up to 3/4" (19 mm) diameter
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed (514550 CSA only)

514550***	16EH-CIM	1	575	3**	20' 6.1 m	82 lbs 37.19 Kg

* Single-phase pumps can use a mechanical float switch or a single-phase control panel for automatic on/off

** Three-phase pumps must have a three-phase control panel for automatic or manual operation

*** CSA only

EFFLUENT PUMPS

14EH/16EH SERIES - 1/2 HP, 1 HP

ENGINEERING DATA

A	B	C
16.2" 41.15 cm	14.1" 35.81 cm	9.9" 25.15 cm

PERFORMANCE DATA

CONSTRUCTION

Motor Housing	Epoxy-coated cast iron
Impeller Material	Epoxy-coated cast iron
Impeller Type	Non-clog
Volute	Epoxy-coated cast iron
Mechanical Shaft Seal	Nitrile with carbon and ceramic faces
Fasteners	Stainless steel
Shaft	Stainless steel
Bearings	Upper and lower ball bearings
Power Cord	SJTW-A (514220, 514221, and 514520) SOW-A (514530, 514540, and 514550)

WS EFFLUENT SERIES - 1/3 HP, 1/2 HP, 1 HP

APPLICATIONS

Effluent wastewater removal, dewatering, water transfer

FEATURES

- Split-phase, oil-filled motor
- Designed for high torque
- Piggyback mechanical float option available for automatic operation
- 2" NPT (51 mm) discharge
- Handles solids up to 3/4" (19 mm) diameter
- 120 °F (49 °C) liquid temperature rating
- cCSAus listed

WSV50 EFFLUENT SERIES - 1/2 HP

APPLICATIONS

Effluent wastewater removal, dewatering, water transfer

FEATURES

- Oil-free Permanent Split Capacitor (PSC) with double ball bearings
- High head model
- Solids handling vortex impeller
- Piggyback mechanical float option available for automatic operation
- 2" NPT (51 mm) discharge
- Handles solids up to 3/4" (19 mm) diameter
- 120 °F (49 °C) liquid temperature rating
- cCSAus listed

WE SERIES - 1/2 HP

APPLICATIONS

High head filter effluent, filtered effluent service, aeration, ornamental fountains, water fountains

FEATURES

- Franklin Electric submersible motor
- Heavy-duty, 300 V, 10 ft (3 m) SJOW motor stripped leads
- Removable built-in check valve
- Non-corrosive thermoplastic discharge and motor brackets
- Proven "PPO" staging allows close tolerances and increased performance
- High quality top bearing for maximum durability and years of reliable service
- Hex rubber bearing has extra-large surface for shaft stability and multiple flow channels for keeping particles away from bearing surfaces
- Stainless steel up thrust washer prevents excessive wear in service applications
- cCSAus listed

C1 SERIES - 1/2 HP

APPLICATIONS

Gray water pumping, filtered effluent service water pumping, water reclamation projects such as pumping from rain catchment basins, aeration and other fountain or pond applications, agriculture and livestock water pumping

FEATURES

- Supplied with a removable 5" base for secure and reliable mounting
- Bottom suction design
- Robust thermoplastic discharge head design resists breakage during installation and operation
- Single shell housing design provides a compact unit while ensuring cool and quiet operation
- Hydraulic components molded from high quality engineered thermoplastics
- Optimized hydraulic design allows for increased performance and decreased power usage
- All metal components are made of high grade stainless steel for corrosion resistance
- Available with a high quality 115 V or 230 V, 1/2 hp motor
- Fluid flows of 10, 20, and 30 gpm, with a maximum shut-off pressure of 100 psi
- Heavy-duty 600 V 10 foot SJ00W jacketed lead

PERFORMANCE DATA

BE SERIES - 1/2 HP, 3/4 HP

APPLICATIONS

Dewatering, flood irrigation, livestock watering, and for pumping septic tanks to the leach field

FEATURES

- Higher than NEMA service factor dual compartment motor
- Designed for continuous duty
- Built-in check valve
- Handles solids up to 1/4" (6.4 mm) diameter
- 1-1/4" (31.75 mm) NPT discharge
- 120 °F (49 °C) liquid temperature rating
- CSA listed

9SC SERIES - 4/10 HP

APPLICATIONS

Sewage and effluent wastewater transfer, dewatering

FEATURES

- Permanent Split Capacitor (PSC)
- Energy-saving low amp draw
- Designed for continuous duty
- 2" FNPT (51 mm) discharge
- Handles solids up to 2" (51 mm) diameter
- Multiple switch options for automatic operation
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

* On SFS models

** On 30' 9SC-CIA-RF and 9SC-CIM models

10SC SERIES - 1/2 HP

APPLICATIONS

Sewage and effluent wastewater transfer, dewatering

FEATURES

- Permanent Split Capacitor (PSC)
- Energy-saving low amp draw
- Designed for continuous duty
- 2" FNPT (51 mm) and 3" FNPT (76.2 mm) discharge models
- Handles solids up to 2" (51 mm) diameter
- Multiple switch options for automatic operation
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

SERIES SPECIFICATIONS

WSV52 SERIES - 1/2 HP

APPLICATIONS

Ideal for handling raw sewage, commercial dewatering sump applications with up to 2" solids

FEATURES

- Oil-free permanent split capacitor (PSC) motor with double ball bearings
- Designed for continuous duty
- 2" FNPT (51 mm) discharge
- Handles solids up to 2" (51 mm) diameter
- Power cord sealed at motor housing
- 140 °F (60 °C) liquid temperature rating
- cCSAus listed

WS SERIES - 1/2 HP, 1 HP

APPLICATIONS

Ideal for handling raw sewage, commercial dewatering sump applications with up to 2" solids

FEATURES

- All cast iron construction
- Oil-filled motor with double ball bearing capacitor start designed for high torque (single-phase only)
- Designed for continuous duty
- Switch options for automatic operation
- 2" (50 mm) NPT
- Handles solids up to 2" (51 mm) diameter
- Power cord sealed at motor housing
- 120 °F (49 °C) liquid temperature rating
- cCSAus listed

PERFORMANCE DATA

CONSTRUCTION

Cover	Epoxy-coated cast iron
Motor Housing	Epoxy-coated cast iron
Impeller Material	Red brass
Impeller Type	Vortex
Volute	Epoxy-coated cast iron
Mechanical Shaft Seal	Carbon/ceramic
Fasteners	Stainless steel
Shaft	Stainless steel
Bearings	Upper and lower ball bearings
Power Cord (Stripped Leads)	14/3, SOW (1-phase); 14/4, SOW (3-phase)

PIT+PLUS® JR - PREMIUM SIMPLEX SYSTEMS

APPLICATIONS

Collection of sewage, drainage or seepage water

FEATURES

- Roto-molded polyethylene basin 24" x 24" (61 cm x 61 cm)
- Radial rib design for extra strength
- Molded inlet hub
- Molded anti-torque stops
- 360° molded handle
- Integrated anti-floatation collar
- Optional alarm versions
- Pre-assembled
- Functional and aesthetic finish cover
- Pump access cover
- Recessed discharge and vent location
- Independent recessed switch module
- Monolithic molded basin top
- Switch cord grips and locators for directional control
- 4/10 hp or 1/2 hp sewage pump option available

Patent Pending

SIMPLEX AND DUPLEX SYSTEMS

APPLICATIONS

Collection of sewage, effluent, drainage or seepage water

FEATURES

- Basins available in high density polyethylene structural foam [18" (46 cm), 24" (61 cm), and 30" (76 cm) dia.] or fiberglass [36" (91 cm) dia]
- Complete with necessary sealing hardware and flanges
- Available with 2" or 3" (51 mm or 76 mm) vent or discharge flange
- 4" inlet hub is included with the basin
- Watertight and gas-tight when properly installed
- Durable steel gasketed cover standard on simplex and duplex basins
- One-piece, seam-free construction on basin
- Duplex covers include two access plates
- Ready-to-install for simple and economical installation
- Temperature rated up to 135 °F (57.2 °C)

WCR SERIES WATER COLLECTION & REMOVAL SYSTEMS

APPLICATIONS

Collection of sewage, effluent, drainage or seepage water

FEATURES

- Pre-packaged 20" x 30" (51 cm x 76 cm) polyethylene basin with 4/10 hp sewage pump
- Handles up to 2" (51 mm) solids
- Options of structural foam or steel covers
- Includes schedule 40 PVC discharge piping with pre-drilled air-bleed hole
- Designed with side outlets for discharge and electrical cords
- Includes 2" (51 mm) bulkhead fitting to easily route power cords out of basin
- Once installed, no digging required for system servicing
- cCSAus listed pump only

PERFORMANCE DATA

ACCESSORIES

PIGGYBACK DIAPHRAGM SWITCH

APPLICATIONS

- Converts manual pumps to automatic operation

FEATURES

- RS-5 converts any manual pump, up through 1/2 hp (115 V)
- RS-5-LL (low level) converts any manual pump, up through 1/3 hp (115 V)
- CSA listing

Item No.	Model	Volts	Max. Amps	Cord	Mounted to 5-MSP pump	
					On Level	Off Level

599019	RS-5LL	115	10	25' 7.6 m		

PIGGYBACK MECHANICAL VERTICAL FLOAT SWITCH

APPLICATIONS

- Converts manual pumps to automatic operation

FEATURES

- Converts any manual pump, up through 1/2 hp (115 V) or 1 hp (230 V)
- Adjustable pumping range from 6.5" (16.5 cm) to .75" (1.9 cm)
- Designed for use in confined areas
- Not sensitive to turbulence
- /CSA listing

Item No.	Model	Volts	Max. Amps	Cord

599263	RVMS-20	115/230	13	20' 6 m

PIGGYBACK MECHANICAL FLOAT SWITCH

APPLICATIONS

- Converts any manual pump to automatic per ratings listed
- For use in water and sewage

FEATURES

- Adjustable pumping range
- Includes standard mounting clamp
- Heavy-duty contacts

ACCESSORIES

DOUBLE-FLOAT PIGGYBACK MECHANICAL FLOAT SWITCH

APPLICATIONS

- Pump control

FEATURES

- Controls pumps up to 1 hp (120 V) and 2 hp (230 V)
- Adjustable pumping range of 1.75" (4.4 cm) to 48" (122 cm)
- Consists of two floats, one of which contains a holding relay, enabling the floats to function in series
-  and CSA listing

14940411	15DFMMD2WOP	230 (w/o plug)	13

SUMP PUMP SWITCH REPAIR KIT

APPLICATIONS

- Switch repair kit

FEATURES

- Includes pressure switch bracket assembly, screw, diaphragm, and O-ring

Item No.	Model	Volts	Housing
599300	SPRK-1	6-CIA, 8-CIA, and 8-CBA	✓
599310	SPRK-1-ML	6-CIA-ML (used in WRSC-6)	✓
599320	SPRK-2	5-ASP, 6-CIA, 8-CIA, and 8-CBA	–
599314	SPRK-2-ML	6-CIA-ML (used in WRSC-6)	–
599350	SPRK-3	10-CIA and 12-CBA	–

SUMP PUMP DISCHARGE KITS

APPLICATIONS

- Discharging water out of the basement sump

FEATURES

- Kit works with all types of sump pumps
- Kit includes 1-1/4" x 24' (31.7 mm x 7.3 m) corrugated polyethylene hose, ABS threaded 1-1/2" MNPT (38 mm) x 1-1/4" (31.7 mm) barbed adapter and 1-1/4" MNPT (31.7 mm) x 1-1/4" (31.7 mm) barbed adapter and galvanized steel clamp

Item No.	Model	NPT
599303	SPDK	1-1/4" 31.7 mm
		1-1/2" 38 mm

ACCESSORIES

HWAB ALARM

APPLICATIONS

- Indoor high water alarm

FEATURES

- NEMA 1 thermoplastic enclosure
- Mechanical float switch with 15 ft (4.6 m) cable
- Alarm has red LED warning light, horn with silence switch, and test button
- 9 VDC battery backup
- UL and CSA listing

Item No.	Model	Volts	Cord
513288	HWAB	115	6' 1.83 m

303HWXT ALARM

APPLICATIONS

- Indoor/outdoor high water alarm

FEATURES

- Type 3R watertight thermoplastic enclosure
- Mechanical float switch with 15 ft (4.6 m) cable
- Alarm has red warning light, horn with silence switch, and test button
- Includes pre-mounted terminal block so enclosure can also be used as a junction box
- UL and CSA listing

Item No.	Model	Volts
513273	303HWXT	115

INDOOR DUPLEX PUMP CONTROL ALTERNATOR AND ALARM SYSTEM

APPLICATIONS

- Switch repair kit

FEATURES

- Easy-to-install, NEMA 1, 3/4 hp device
- Low-cost alternative to conventional duplex control panels
- Operates two manual sump, sewage or effluent pumps
- Alternates to standby pump if energized pump fails to turn on
- Audible alarm and red light indicator
- Operates single-phase pumps with 15 max. run amps
- cULus listing

Item No.	Model	Volts	Max. Amps	Cord
513289	IDC-115	115	15	9.5' 2.9 m

LOW VOLTAGE WATER ALARM

APPLICATIONS

- Remote water sensor and alarm
- Warns of leaks and overflows in bath, kitchen, laundry, attic, basement, or anywhere there is a potential for leaks to occur

FEATURES

- Remote sensor detects water and sounds alarm
- 85 decibel alarm sounds for three days
- Sensor and alarm can be placed up to 6 ft apart
- Sensor has both suction cup and adhesive to secure in place
- Includes wall mounting hardware
- Space saving design
- Circuit test/reset button ensures system is working
- Low battery signal when battery needs replaced
- Requires one 9 V battery (not included)

Item No.	Model	Volts
513379	HW-9	9V/DC

ACCESSORIES

CONTROLS (SIMPLEX SYSTEMS)

APPLICATIONS

- Indoor/outdoor simplex alarm system and pump control

FEATURES

- Includes control panel with audible alarm, silence switch, and red alarm beacon
- Three floats, one each for high water, pump on and off
- Floats have 20 ft (6 m) power cords
- HOA switch offers either hand, off or automatic operations
- Two floats - pump on/off and alarm, 513257 only
- UL and C-UL listing

SINGLE-PHASE

Item No.	Model	Volts	Hz	Amps
513267	1121W120H17A	120/208/230	60	15-20
513257	1151W200H17A	115/230	60	0-15

THREE-PHASE

Item No.	Model	Volts	Hz	Amps
513265	3121W611H	208/240	60	13-18
513282	3121W201H17A	208/240/480	60	2.5-4
513284	3121W401H17A	208/240/480	60	6-10
513286	3121W511H17A	208/240/480	60	9-14
513307	3121W301H17A	208/240/480	60	4-6.3

CONTROLS (DUPLEX SYSTEMS)

APPLICATIONS

- Indoor/outdoor duplex alarm system and pump control

FEATURES

- Includes duplex pump control and alarm devices
- Pump alternator
- Visual and audible alarm and light system with silence
- Three floats, one each for high water, pump on and pump off (513258 only)
- Floats have 20 ft (6 m) power cords
- HOA switch offers either hand, off or automatic operations
- UL and C-UL listing

SINGLE-PHASE

Item No.	Model	Volts	Hz	Amps
513258	1221W120H6A17A	120/208/230	60	0-20

513287	3221W511H17A	208/240/480	60	9-14
513266	3221W611H17A	208/240/480	60	13-18
513308	3221W301H17A	208/240/480	60	4-6.3

JUNCTION BOXES

APPLICATIONS

- Provides a convenient location to connect all wiring required for a typical pumping station, on-site system, or other electrical installation

FEATURES

- NEMA 4X waterproof fiberglass thermoplastic enclosure

Item No.	Model
513281	JB66-3

LG PLUGGER

APPLICATIONS

- For wiring a pumping station installation

FEATURES

- Utilizes a receptacle to accept a 120 V or 230 V piggyback plug and a pump plug
- Liquid-tight seal and strain relief for the cable entering the junction box from the pumping station
- Terminal strip that can be used for connecting an alarm system to the junction box
- UL and CSA listing

Item No.	Model	Volts	Alarm	Float
513290	JPB120V	120	-	-
513292	JBP120V-TA1	120	101HW	Yes
513295	JBP230V-TAXT	230	303HWXT	Yes

ACCESSORIES

PUMP DISCONNECT

APPLICATIONS

- When discharge is no lower than 18" (46 cm) below grade or where guide rails are not necessary

FEATURES

- Non guide rail disconnect
- Point of discharge should be above the liquid level

Item No.	Model	Disconnect
513302	PD-2	2" 51 mm

GUIDE RAIL SYSTEM

APPLICATIONS

- For installations with a total depth of over 5 ft (1.5 m) when the discharge pipe is 18" (46 cm) or more below grade, particularly when the liquid level is above the discharge level*

FEATURES

- 3/4" (19 mm) IPS (iron pipe size) pipe rails should be used on the 1-1/4" (31.7 mm) and 2" (51 mm) system and 1-1/4" (31.7 mm) IPS pipe rail on the 3" (76 mm) system
- Brass foot guide supplied for use with steel pipe
- Guide rail brackets and steel stand-off brackets included with each system to support the upper end of the guide rail pipes
- One intermediate guide rail bracket is required for every 10 ft (3 m) of rail (guide rail pipes, lifting chain, and pull rod not included)

Item No.	Model	Discharge
513305	GR-3/4-114D	1-1/4" 31.7 mm
513301	GR-3/4	2" 51 mm
513300	GR-1-1/4	3" 76 mm

All guide rail products can be used with any of the Franklin Electric, Little Giant effluent and sewage pumps having a 1-1/4" (31.7 mm), 2" (51 mm), or 3" (76 mm) discharge.

*NOTE: Not for duplex installations. For guide rail information on duplex installations, please consult the factory.

INTERMEDIATE GUIDE RAIL BRACKETS

APPLICATIONS

- For use with guide rail systems

Item No.	Model	Guide Rail
513303	IGR-3/4	3/4" 19 mm (for use with GR-3/4)
513304	IGR-1-1/4	1-1/4" 31.75 mm (for use with GR-1-1/4)

SA-1 (SACRIFICIAL ANODE)

APPLICATIONS

- Magnesium accessory for use with aluminum-body pumps

FEATURES

- Provides corrosion protection
- Lead wire

Item No.	Model	Wire
599002	SA-1	8" 20 cm

ACCESSORIES

CORD CONNECTORS

APPLICATIONS

- Provides strain relief

FEATURES

- Cord connector is liquid tight
- Polyamide neoprene gland resists salt water, weak acids/alkalis and other chemicals

Item No.	Model	Cord	Wire/Cable (AWG)
599207	CC-1	.270" to .480" 6.9 mm - 12.2 mm	18/2, 18/3, 18/4, 16/2 16/3, 16/4, 14/2, 14/3
599213	CC-3	.545" to .709" 13.8 mm - 18 mm	14/2, 14/3, 14/4, 12/2 12/3, 12/4, 10/2, 10/3

DISCHARGE ADAPTERS

APPLICATIONS

- Allows use of garden hose with utility and sump pumps

FEATURES

- Polypropylene, rust-resistant

Item No.	Model	Size
599030	GH-1 Adapter (fits 5-MSP/ASP)	1" MNPT x 3/4" GHT 2.54 mm x 19 mm
599025	GH-3/4 Adapter	1-1/4" MNPT x 3/4" GHT 31.7 mm x 19 mm
599026	AD-6 Adapter (6-pk)	1-1/2" MNPT x 1-1/4" FNPT 38 mm x 31.7 mm

CAST IRON FULL FLOW CHECK VALVES

FEATURES

- Vertical or horizontal installation
- Full-flow design
- Stops backflow of water
- Rated at 50 psi (115 ft [35 m] head) at 130 °F (55 °C)
- Cast iron NPT

Item No.	Model	Volts
599132	CVCI-112NPT	1-1/2" 38 mm
599133	CVCI-2NPT	2" 51 mm
599134	CVCI-3NPT	3" 76 mm

CAST IRON SLIP X SLIP UNION CHECK VALVE

FEATURES

- Vertical or horizontal installation
- Allows passage of 1-1/2" (38 mm) solids
- Checks backflow of water and sewer gas
- 2" (51 mm) ABS, PVC, steel pipe or copper piping
- Rated at 4.3 psi (10 ft [3 m] head) at 130 °F (55 °C)
- Cast iron NPT

Item No.	Model
599135	CVCI-2

ACCESSORIES

CV-112 CHECK VALVE

FEATURES

- Universal check valve for sump pumps
- 1-1/2" MNPT (38 mm) x 1-1/2" (38 mm) ID tubing

Item No.	Model	Material
577130	CV-112	PVC

CV-114/112 CHECK VALVE

FEATURES

- Sump pump check valve fits both 1-1/4" (31.7 mm) and 1-1/2" (38 mm) pipe
- Full-flow, slip x slip design passes 1" (25.4 mm) solids

Item No.	Model	Material
599059	CV-114/112	ABS

CV-SE CHECK VALVE

FEATURES

- Hose-connected check valve for 2" (51 mm) IPS pipe
- Allows passage of 3/4" (19 mm) solids

Item No.	Model	Material
940021	CV-SE	ABS

CV-SE1 CHECK VALVE

FEATURES

- Uses compression gaskets to connect to 1-1/2" (38 mm) IPS pipe
- Full-flow design passes 1-1/2" (38 mm) solids

Item No.	Model	Material
940019	CV-SE1	PVC

CV-SE2 CHECK VALVE

FEATURES

- Uses compression gaskets to connect to 2" (51 mm) IPS pipe
- Full-flow design passes 2" (51 mm) solids

Item No.	Model	Material
940022	CV-SE2	PVC

CV-SE3 CHECK VALVE

FEATURES

- Uses compression gaskets to connect to 3" (76 mm) IPS pipe
- Full-flow design passes 3" (76 mm) solids

Item No.	Model	Material
940023	CV-SE3	PVC

CV8V-2 CHECK VALVE

FEATURES

- PVC check valve/ball valve combination uses compression gaskets to connect to 2" (51 mm) IPS pipe
- Full-flow design passes 2" (51 mm) solids

Item No.	Model	Material
599160	CVBV-2	ABS

CV8V-2U CHECK VALVE

FEATURES

- PVC check valve/ball valve combination uses union fittings to connect 2" (51 mm) IPS pipe
- Full-flow design passes 2" (51 mm) solids
- Pressure rating: 100 psi @ 72 °F

Item No.	Model	Material
599161	CVBV-2U	PVC

ACCESSORIES

GP GRINDER SERIES (CONTROL PANEL AND ALARM)

APPLICATIONS

- Designed exclusively for the GP Manual Grinder Series

FEATURES

- Properly sized start components maximize efficiency and service life of the GP grinders
- Color-coded terminal strip for ease of installation
- Circuit breaker, audible alarm, silence switch, and red flashing light are enclosed in a NEMA 4X waterproof enclosure
- Three floats (sold separately) control on, off, and alarm functions
- UL and CSA listing

SIMPLEX

Item No.	Model	Volts	Amps	Floats
513354	A-SF230C-BG-215	208/230	16	3 floats required

DUPLIX

Item No.	Model	Volts	Amps	Floats
513355	1026540	208/230	34	4 floats required

The GP Grinder Series requires a specific controller panel or capacitor kit from Franklin Electric specifically matched to the Little Giant pump for proper operation and third-party approvals.

JUNCTION BOX ALARM KIT

APPLICATIONS

- Designed specifically for auto grinder installations

FEATURES

- Circuit breaker
- Labeled terminal block
- Alarm block
- Alarm float

Item No.	Model
513297	JBAK

GP CUTTERS

APPLICATIONS

- For GP Series

Item No.	Use
14940131	Replacement Cutter Kit

CONTROL FLOATS

APPLICATIONS

- For use with control panel and alarms

FEATURES

- Mechanically activated contacts
- Not sensitive to rotation
- 5 amp, 115/230 VAC, 50/60 Hz

Item No.	Model	Switch	Cord
950266	CFSW	Weighted control float switch	20' 6 m
950267	CFST	Control float switch with cable clamp	20' 6 m

GRINDER LEG KIT

APPLICATIONS

- Grinders

FEATURES

- Includes three stainless steel support legs with stainless steel hardware
- A special stainless steel leg kit is available for "hard-piped" installations
- Easy to install, the legs raise the pump inlet area to approximately 4" (102 mm) off the surface to ensure clearance for solids to enter

Item No.	Model	Use
599078	GLK	For GP series only

CAPACITOR KIT

APPLICATIONS

- For GP series

FEATURES

- Includes start capacitor, run capacitor, relay, end caps, and mounting hardware

Item No.	Volt Range
520859	208-230

GUIDELINES FOR SIZING

SYSTEM CAPACITY

System Capacity refers to the rate of flow in gallons per minute (gpm) necessary to efficiently maintain the system. The “Fixture Unit” method is suggested for determining this figure. This approach assigns a relative value to each fixture or group of fixtures normally encountered. Determination of the required System Capacity is as follows:

- List all fixtures involved in the installation and using Figure 1, assign a Fixture Unit value to each. Add to obtain total.
- Referring to Figure 2, locate the total Fixture Unit amount along the horizontal axis of the graph and follow vertically until intersecting the plotted line. Read the System Capacity in gpm along the vertical axis.

FIGURE 1

Fixture Description	Unit Value	Total Used
Bathroom group, consisting of lavatory, bathtub or shower, and (direct flush) water closet	10	
Bathroom group, consisting of lavatory, bathtub or shower, and (flush tank) water closet	6	
Bathtub with 1-1/2" trap	2	
Bathtub with 2" trap	3	
Bidet with 1-1/2" trap	3	
Dental unit or cuspidor	1	
Drinking fountain	1	
Dishwasher (domestic type)	2	
Kitchen sink (domestic)	2	
Kitchen sink (domestic with waste grinder)	3	
Lavatory with 1-1/2" trap	1	
Lavatory (barber or beauty shop)	2

TOTAL		

FIGURE 2

FIGURE 3

GUIDELINES FOR SIZING

TOTAL HEAD

Total Head is a combination of two components — static head and friction head — and is expressed in feet (refer to Typical Installation illustration, Figure 3).

Static Head is the actual vertical distance measured from the minimum water level in the basin to the highest point in the discharge piping.

Friction Head is the additional head created in the discharge system due to resistance to flow within its components. All straight pipe, fittings, valves, etc. have a friction factor which must be considered. These friction factors are converted to, and expressed as, equivalent feet of straight pipe, which can then be totaled and translated to friction head depending on the flow and pipe size. Basically, this is reduced to four steps.

1. It will be necessary to determine the discharge pipe size. In order to ensure sufficient fluid velocity to carry solids, (generally accepted to be 2 ft per second), flows should be at least:
 - 9 gpm through 1-1/4" pipe
 - 13 gpm through 1-1/2" pipe
 - 21 gpm through 2" pipe
 - 30 gpm through 2-1/2" pipe
 - 46 gpm through 3" pipe
2. The length of the discharge piping is measured from the discharge opening of the pump to the point of final discharge, following all contours and bends.
3. To determine the equivalent length of discharge piping represented by the various fittings and valves, refer to Figure 5 and total all values. Add this to the measured length of discharge pipe and divide by 100 to determine the number of 100 ft increments.
4. Refer to Figure 4 and find the required Pump Capacity (determined from Figure 2). Follow gallons per minute to pipe size being used. Multiply this number by the number of 100 ft increments.

Add the Static Head and Friction Head to determine Total Head.

FIGURE 4

GUIDELINES FOR SIZING

PUMP SELECTION

Every centrifugal pump has a unique performance curve. This curve illustrates the relationship of flow (gpm) to pressure (total head) at any point. The pump will operate at any point along this performance curve. Pump capacity is therefore the flow the pump will generate at any specific pressure. The object is to select a pump whose performance curve passes either through, or close to, the design condition, preferably above. Refer to Figure 7.

Solids Handling requirements may be determined by local codes and/or by the type of application and types of solids anticipated. Unless otherwise stated by codes, a sewage pump should have the capability of handling spherical solids of at least 2 inches in diameter in installations involving a water closet.

Basin Size selection is best accomplished by relating to required System Capacity as determined by the Fixture Unit method.

Figure 6 shows recommended basin diameters, assuming the normal pump differential (distance in inches between turn-on and turn-off), and running time ranges from 15 seconds to 4 minutes. Basin depth, however, should be at least 24 inches below basin inlet for most pumps and deeper where greater pumping differentials are anticipated.

NOTE: Since basin size is directly related to pump operation frequency, it is important to select a basin of sufficient size to ensure that the pump does not short cycle.

The question of whether to use a Simplex or Duplex System depends on the type of installation and/or local codes. Generally, a determination can be made using the following guidelines.

1. Domestic: Simplex System is usually adequate.
2. Commercial: Optional — Depending on the type of business and the need for uninterrupted sanitary drainage facilities.
3. Public or Industrial: Duplex System is essential.

While you are sizing the system and before you select the pump, you will need to know and consider or make allowances for the following:

- Volts/Phase/Hertz — What is available?
- Will the pump share a circuit?
- Does the home, business, etc. have circuit breakers or fuses?
- What is the breaker or fuse amp rating? Make sure it is enough.
- Check local or state codes for:
 - Solid size requirements
 - Amp ratings/circuit cord size/ratings or type
 - Pipe material/size/depth to bury
 - Tank size/location
- Are there plans for future expansion? As in, adding upstairs bath, basement plumbing, washing machine, etc.

Select the minimum basin depth so that 2-1/2 ft of basin depth in gallons; pump capacity in gpm
Shaded cells highlight the acceptable basin size

GUIDELINES FOR SIZING

EXAMPLE SIZING PROBLEM

What Pump Capacity would be required to handle the drainage from a 4 bathroom home, also including a dishwasher, a washer, a laundry tray, a kitchen sink, water softener, basement shower, a 13,000 gallon pool, and a bar sink (1-1/2" trap)?

- From Figure 1:

Description	Fixture Units
Four bathroom groups	24
Water softener	4
Dishwasher	2
Washing machine	2
Laundry tray	2
Kitchen sink with disposal	3
Basement shower	2
Swimming pool	13
Bar sink (unlisted 1-1/2")	3
FIXTURE UNITS TOTAL	55

- Refer to Figure 2: Find 55 fixture units on the horizontal axis. Follow vertically until intersecting the line then horizontally to the left. The Pump Capacity on the vertical axis is 30 gpm.

Determine the Total Head of the installation illustrated in Figure 3, the Typical Installation Illustration:

- That Static Head in this instance is 7 ft.
- Friction Head:
 - Since the required Pump Capacity in this illustration of 30 gpm is less than the 46 gpm necessary to carry solids through 3" pipe, 2" or 2-1/2" pipe should be used. If 3" pipe is preferred or required, a Pump Capacity of at least 46 gpm is required.
 - Measurement of the length of the discharge pipe totals 200 ft.
 - Refer to Figure 6 and note the friction factor in equivalent feet for each fitting:

3 - 90° elbows, 2"	16 - equivalent feet
1 - gate valve, 2"	1 - equivalent foot
1 - swing check valve, 2"	17 - equivalent feet
Total:	34 equivalent feet

Adding 34 ft to the measured pipe length, the total effective pipe length becomes 234 ft or 2.34 100 ft increments.

- Refer to Figure 4, find the 30 gpm required Pump Capacity on the left scale and follow over to the 2" PVC pipe size column. Friction Head is $1.8 \times 2.34 = 4.2$ ft.

- Total Head Required: Total Head = Static Head + Friction Head

- Example: Total Head = 7 + 4.2 Total Head = 11.2

Due to the existence of water closets in this installation, a pump with 2" Solids Handling capacity should be used unless otherwise specifically stated by applicable codes. Use Figure 7 to select pump. To determine the Basin size, find the Pump Capacity (30 gpm) in the column on the left of Figure 6. Any Basin diameter of 18" or greater is acceptable. Since this application is domestic, a Simplex System is sufficient.

Summary: Recommended selections for this installation would be a Simplex System utilizing an 18" or greater diameter Basin and a 2" Solids Handling pump capable of delivering at least 30 gpm at 11 ft.

GUIDELINES FOR SIZING

SUMMARY WORKSHEET

Number of Fixture Units _____

Flow Rate (gpm) _____

Total Head Required _____

Pump Selection _____

Typical Single Family Dwelling Sewage Pump Chart

Note: The data contained herein is for reference only. Proper sizing and selection of sewage pumps requires consideration of many factors. Always consult applicable local codes before installing any equipment. This chart is based on a residential application with not more than 34 fixture units (values assigned to each plumbing fixture). The TDH (Total Dynamic Head) of the system is calculated based on total vertical lift, horizontal length of discharge piping, and the friction losses for 2" diameter plastic pipe (3" diameter plastic pipe where the 16S pump is shown).
